Letter SECON - 003

RE: Project Delay

Mr. Ellason,

The Department has resolved both the environmental document and funding issues stemming from March 2010. Your patience over this past year is sincerely appreciated.

SECON is authorized to proceed with the work in this contract as of the date of this letter. The Department intends to execute a change order extending the contract completion date to September 30, 2011. At your earliest convenience, submit your proposed costs for impacts incurred due to this delay for inclusion in the change order.

Please note that the Department's Project Engineer is now Allen Shepard. He may be reached at 907-254-1996 and [allen.shepard@alaska.gov](mailto:allen.shepard@alaska.gov) and is currently stationed in Thorne Bay.

An updated project schedule is requested along with any changes in SECON project staffing since the submittals from spring 2010.

Feel free to contact me directly at 907-465-4428 if you have any questions. Thank you.

Sincerely,

Maureen A. Hansen, PE  
Construction Project Manager
